

Mohammad Saeed

Software Engineer | Full-Stack TypeScript Developer

Islamabad, Pakistan | +92 348 8938007 | imsaeedsaeedi@gmail.com

github.com/msaeedsaeedi | linkedin.com/in/msaeedsaeedi

PROFILE

Software Engineer focused on building full-stack web applications with TypeScript, Angular, React/Next.js, REST APIs, SQL databases, and Docker-based deployments. Experience spans product engineering, frontend architecture, UI/UX collaboration, open-source platform development, and team leadership. Strong computer science foundation in data structures, OOP, operating systems, databases, and software engineering.

CORE SKILLS

Frontend: TypeScript, Angular, RxJS, React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI, Shadcn/UI

Backend & APIs: Node.js, NestJS, Express.js, REST APIs, Prisma, PostgreSQL, MySQL, SQL Server, SQLite

DevOps & Tools: Git, GitHub, Docker, Docker Compose, VPS Deployment, Traefik, GitHub Actions, Turborepo, Bun, Terminal

Engineering Practices: Component architecture, API integration, CI/CD workflows, code reviews, sprint planning, agile collaboration

Design & Product: Figma, wireframes, prototypes, product planning, stakeholder communication, Linear, ClickUp

PROFESSIONAL EXPERIENCE

CMOonTheGO

Full-Stack Engineer

Jan 2026 – Present

Islamabad, Pakistan

- Build and maintain product features for marketing and customer-engagement workflows using TypeScript, React, REST APIs, and SQL-backed application logic.
- Integrate frontend screens with backend services, focusing on reliable data flow, reusable UI components, responsive layouts, and maintainable feature modules.
- Collaborate with product and engineering stakeholders to convert feature requirements into implementation tasks, delivery plans, and production-ready releases.
- Improve application structure, deployment readiness, and code quality through Git-based workflows, review cycles, and repeatable engineering practices.

Prime Innovators

Founder & CEO

Nov 2025 – Present

Islamabad, Pakistan

- Founded and lead Prime Innovators, a Pakistan-focused open-source talent ecosystem helping developers build verified reputation through real contributions, not resume claims.
- Lead a 10-member cross-functional team across engineering, AI/ML, security, product, and operations to execute the platform roadmap from research and architecture to MVP development.
- Architected the core platform as a TypeScript monorepo using Next.js, NestJS, Prisma, PostgreSQL, Redis, Docker Compose, Traefik, and shared contract-driven APIs.
- Designed platform workflows for GitHub OAuth onboarding, contributor and maintainer roles, project governance, protected routes, verified contribution history, and backend-enforced access control.
- Defined the long-term ecosystem strategy across contributors, maintainers, sponsors, and recruiters, with planned AI-powered impact scoring, skill graphs, transparent sponsorships, and recruiter discovery.

Fastrack

Software Engineer

Mar 2025 – Oct 2025

Islamabad, Pakistan

- Built full-stack features for Fastrack, an AI-powered hiring platform automating recruiter workflows across sourcing, shortlisting, outreach, scheduling, and applicant tracking.
- Developed recruitment dashboards and candidate workflow features using Next.js, Supabase, API integrations, and structured data handling.
- Implemented Docker-based deployment workflows with Cloudflare-backed hosting and GitHub Actions CI/CD for automated build, release, and deployment processes.
- Contributed to technical planning, feature breakdown, architecture discussions, code reviews, and integration decisions for a fast-moving HRTech product.

Fast Developers Club

Senior Web Developer; later Web Development Lead

Nov 2023 – Aug 2024

Islamabad, Pakistan

- Led development of the Fastrack MVP as the first engineer on the project, building Angular-based frontend modules and responsive user interfaces.

- Translated Figma designs into production UI using HTML, CSS, JavaScript, Angular, and reusable component patterns.
- Promoted to Web Development Lead after core contributions; mentored developers, reviewed code, and supported architectural planning.
- Coordinated feature development across the team and helped maintain delivery quality during active MVP development.

Genesys Research Lab

UI/UX Intern

Jul 2024 – Aug 2024

Islamabad, Pakistan

- Designed mobile-friendly web application screens, wireframes, and interactive prototypes in Figma.
- Worked with peers and frontend engineers to validate design feasibility, visual consistency, and responsive behavior.

Elements Interactive

UI Designer Intern

Feb 2024 – Jun 2024

Remote, Pakistan

- Supported UI design work for digital products while learning practical UI/UX processes, layout systems, and design collaboration.

LitGrey Technologies

Frontend Web Developer Intern

Sep 2021 – Mar 2022

Remote, Pakistan

- Built and optimized Angular 9+ frontend features including dynamic components, reactive forms, data binding, and responsive layouts.
- Strengthened fundamentals in web architecture, frontend development, and maintainable component-based implementation.

SELECTED PROJECTS

Prime Innovators Platform

Next.js, NestJS, Prisma, PostgreSQL, Redis, Docker, Traefik

- Open-source collaboration platform with GitHub OAuth, role-based onboarding, contributor/maintainer flows, protected routes, and project management features.
- Implemented monorepo structure with shared TypeScript contracts to keep frontend and backend DTOs aligned.

Slotty – TA Demo Booking System

NextJS, NestJS, Prisma, PostgreSQL, Redis

- Designed a booking system for assignment demo slots with roles for students, teaching assistants, and course leadership.
- Planned concurrency-safe booking logic using database transactions, active booking checks, slot capacity validation, and CSV-based bulk assignment workflows.

again – Command Repeater CLI

Go, Bubble Tea, Terminal UI

- Built a high-performance CLI tool for repeatedly running commands with an interactive TUI, useful for debugging flaky tests, benchmarking scripts, and stress-testing local services.
- Focused on reliable process execution, live terminal feedback, clean command output, and developer-friendly debugging workflows.

EDUCATION

National University of Computer and Emerging Sciences

BS Computer Science

Aug 2023 – Present

Islamabad, Pakistan

Relevant coursework: Data Structures, Algorithms, OOP, Operating Systems, Databases, Computer Architecture, Software Engineering, Networking, Parallel Processing.

LEADERSHIP

Head Boy – Army Public School and College System

2021 – 2023

Represented the student body, coordinated with faculty and administration, and supported campus events and inter-collegiate activities.

LANGUAGES

English, Urdu
